

AUTOMATING YOUR INVOICES

It's time to streamline online payments with fast, secure transactions, easy API integration, and customizable checkout experiences. It supports multiple payment methods, reduces friction for customers, and provides real-time reporting, automated workflows, and reliable, scalable performance.

linked²invoice

Expert Support

Our dedicated team is available to address any queries, providing unparalleled support.

Seamless User Experience

Enhances the end-user experience by enabling customers to complete transactions directly within the software, eliminating the need to redirect to external platforms. This can lead to higher conversion rates and improved customer satisfaction.

Stronger Security & Compliance

Robust security features, such as tokenization, encryption, and fraud detection.

Efficiency

Automates onboarding and payment processes and data reconciliation within the ISV software, reducing manual tasks, errors, and administrative burdens for both the ISV and their merchant clients.

Wholesale Processor

In addition to lower cost credit card and ACH processing, our solutions options also include dual pricing for zero-fee for your merchant clients.
