Getting started:

The linked2pay gateway integration with Magento facilitates a simple onboarding process which begins with the completion of a paycosmos merchant application. The onboarded merchant will gain access to integration keys that will be entered into Magento to connect so they can begin accepting payments.

Merchant Experience

A streamlined, secure, and unified experience for merchants, allowing them to manage transactions, refunds, and disputes directly from their WordPress dashboard. Merchant using this integration will be able to accept all major credit card and ACH payments.

As a key element of Adobe Commerce, Magento is used by 20% of the top 1000 U.S. retailers and is also popular with B2B wholesalers.

Next-Day Funding

Merchants can receive their funds next day quickly with next day funding options available to them at no extra cost.

Chargeback Protection

Fraud and chargeback protection provides tools and resources to not only help merchants manage chargebacks, but it can also help to prevent them.

Install & Activate

Simple, yet detailed information for connecting the linked2pay gateway can be found at:
